Event Report On

"ENGINEER'S DAY 2026 — HARDWARE CHALLENGE""

13th September, 2026

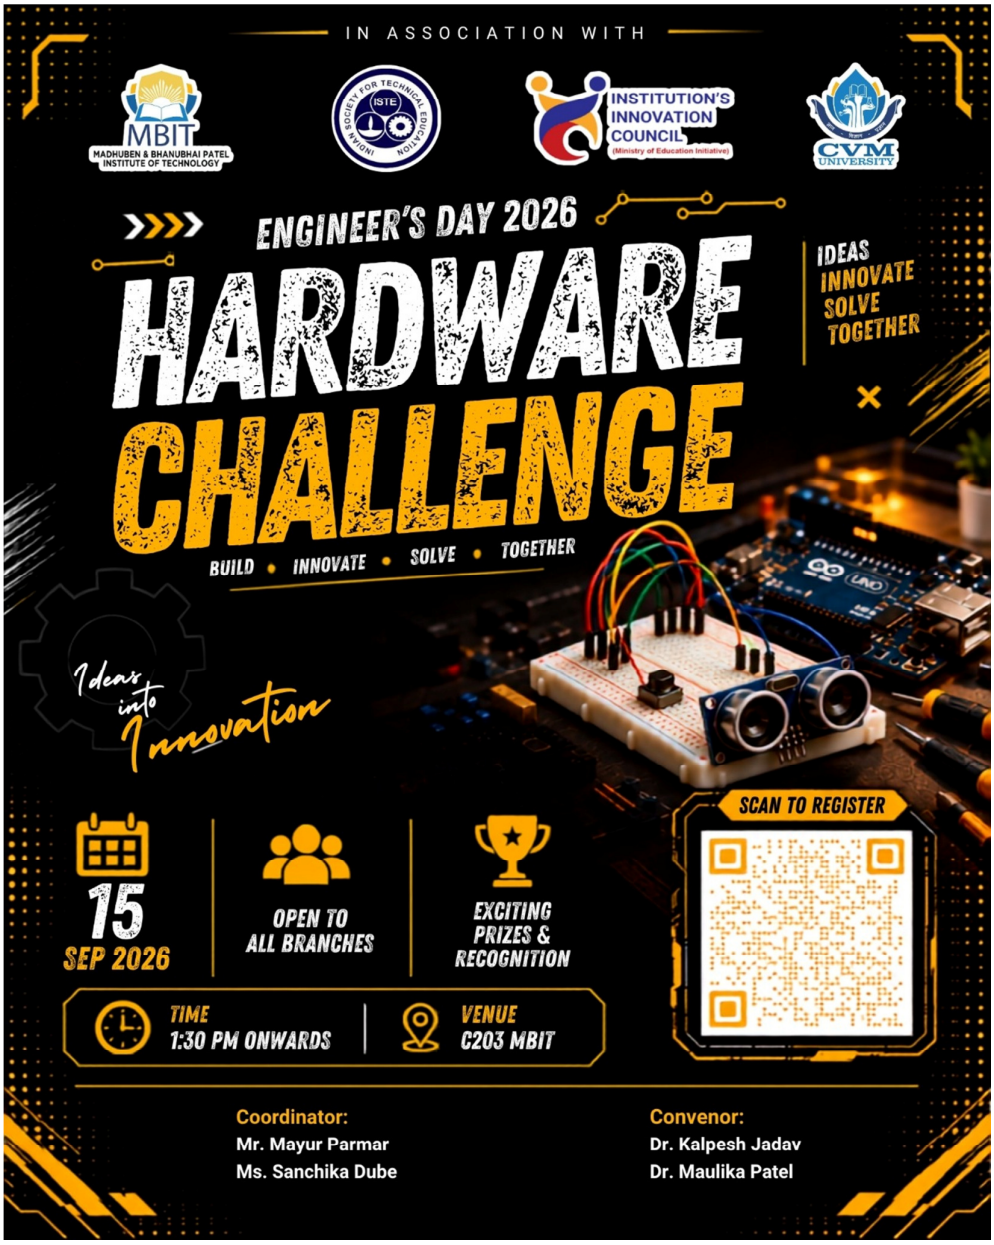

Organized By:-

ISTE STUDENT CHAPTER

MADHUBEN AND BHANUBHAI PATEL INSTITUTE OF TECHNOLOGY

The Charutar Vidya Mandal University (CVM University),

New Vallabh Vidyanagar.

The ISTE Student Chapter of Madhuben & Bhanubhai Patel Institute of Technology (MBIT) successfully organized an event on the occasion of Engineer's Day, providing students with an opportunity to showcase their innovative projects and demonstrate their technical knowledge, creativity, and problem-solving abilities on the auspicious day of "Engineer's Day". The event aimed to encourage students to apply their theoretical knowledge to practical applications and develop confidence through circuit presentation and evaluation.

The event commenced with an introductory address by Mr. Mayur Parmar, who welcomed the participants and initiated the proceedings. Following this, Dr. Kalpesh Jadav, Head of EC and IT Department, greeted the participants and explained the importance of Engineer's Day & extended his wishes to everyone on the occasion of Engineer's Day. He officially initiated the electric circuits and evaluation activities and encouraged the students to actively participate and present their ideas with confidence.

A total of 26 teams were considered for the circuit presentation, out of which 24 teams (48 students) participated in the competition. To conduct the evaluation smoothly and systematically, the participating teams were divided into two groups of 12 teams each. The teams presented their respective projects before the judges and explained their project concepts, implementation, applications, and key features.

The projects were evaluated by the designated judges based on the prescribed evaluation criteria. The evaluation focused on the different aspects specified for the event, allowing the judges to assess the projects in a systematic and fair manner. The students demonstrated their technical understanding, creativity, practical implementation, and ability to explain their project ideas during the evaluation process.

The evaluation panel Dr. Kalpesh Shah from ADIT college and Dr. Mehul Thakkar from MBIT college along with other designated faculty evaluated the teams participated. The judges interacted with the participating teams, observed their project demonstrations, and assessed the projects according to the given evaluation criteria.

During the event, Dr. Maulika Patel, The Principal of MBIT , also visited the venue and greeted the participants. She interacted with the students and took

an interest in some of the circuits presented during the event. Her interaction with the participants added to the encouragement and enthusiasm of the students.

The circuit evaluations were conducted successfully in two batches, with the first batch consisting of 12 teams followed by the second batch of 12 teams. The participation of the students reflected their enthusiasm towards technical activities and their willingness to transform their ideas into practical circuits. The event provided students with valuable exposure to circuit presentation, technical communication, teamwork, and interaction with evaluators.

After the completion of the circuit presentations and evaluation process, the results were declared. The event concluded successfully with appreciation for the participating teams, judges, faculty members, and ISTE members whose efforts contributed to the smooth execution of the event.

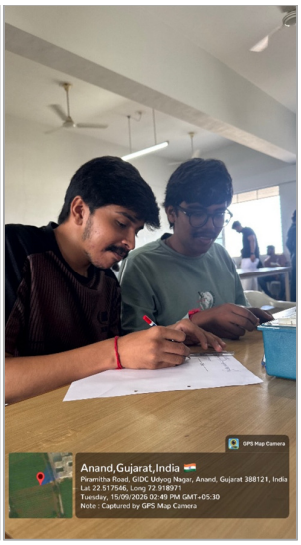

Overall, the Engineer's Day event served as a meaningful platform for students to showcase their technical skills, creativity, innovation, and practical knowledge. It encouraged students to explore engineering concepts beyond the classroom and provided them with an opportunity to gain experience in project development and presentation. The event also promoted a spirit of innovation, teamwork, and technical excellence among the students.

VOTE OF THANKS

We extend our sincere gratitude to our Faculty Coordinator, Mr. Mayur Parmar, for providing constant guidance and encouragement throughout the successful organization of the ISTE Orientation Program. We are equally thankful to all the ISTE core members and volunteers whose dedicated efforts ensured the smooth execution of the event.

A special note of appreciation goes to the enthusiastic support and participation of each and every student for their active participation and keen interest throughout the session. Their interaction and positive response made the program meaningful and engaging.

Finally, we express our heartfelt gratitude to our respected Principal, faculty members, and CVM University for their continuous support and for providing us with the opportunity to organize such an informative and inspiring event for the students.
